

Free Amanita newsletter June 15, 2016: Soybeans & Prophecies in the End Times

*I am the way and the truth and the life.
No one comes to the Father except through me. (John 14:6)*

1. Free market commentary: undreamt soybeans forecasts

This article is dedicated to a topic that is becoming more & more important in the 7 years of Tribulation since 8/24/2015 for investors, traders & consumers: agricultural commodities. Let me focus on *the* food of the end times: soybeans. I not only guarantee you that the perspective offered here is totally new for you, it also connects the dots in a way never discussed before...

2. Prophecies in the end times

In the first 13 years of editing this market letter (2000-13), prophecies were barely taken into consideration. However, since 2013 this has changed from scratch: in the premium area prophecies have been regularly discussed in the past 1-3 years & used to make successful calls. In April 2016 the electrosmog article series was completed after 7 Biblical years, so this newsletter starts a new article series on prophecies.

I thank you so much for your continued interest & bless you from the bottom of my heart!

Yours,

Manfred Zimmel

Amanita Market Forecasting <http://www.amanita.at>

1190 Vienna, Austria - European Union

Content free Amanita newsletter: The free Amanita newsletter is sent out every **2-6 months**, it **complements the Amanita premium subscription**, which is published 1-5 times per month (target: 30-40 premium updates per year).

Premium subscription order page: <http://www.amanita.at/en/market-letter/price-list-order-form-premium-subscription>

FAQ: <http://www.amanita.at/en/fag-eng> For further technical or administrative questions please contact my assistant Peter Ressmann support@amanita.at. Unfortunately for time reasons I usually can't (personally) answer from by non-customers. Phone calls with me are reserved for existing premium subscribers *exclusively*, without exception.

Disclaimer: All information and forecasts provided here have been researched to the best of my knowledge but are by no means a solicitation to buy or sell stocks or other securities. I do not guarantee the accuracy, adequacy, or completeness of any information and I am not responsible for any errors or omissions. Past performance does not guarantee future performance. Free market commentary: undreamt soybeans forecasts

This article is dedicated to a topic that is becoming more & more important in the 7 years of Tribulation since 8/24/2015 for investors, traders & consumers: agricultural commodities. Let me focus on *the* food of the end times: soybeans. I not only guarantee you that the perspective offered here is totally new for you, it also connects the dots in a way never discussed before...

Preliminary remark: ethics of trading agricultural futures

The lying press often claims how condemnable it is to speculate with food. As always, just the opposite of the NWO brainwashing is true. There are mainly 2 factors that create economic wealth: good innovation & correct forecasts. Both contribute to the better use of scarce resources. In the terminology of the Austrian economist *Joseph Schumpeter* innovation leads to a creative destruction. Good forecasts are especially important for agricultural goods, because here weather is a major & rather unpredictable factor. So when a bad harvest looks likely it is necessary to plant more in advance, in order to ensure sufficient supply. The incentive can only be a higher price *before* the growing season, which requires smart speculators with deep pockets. Another argument for speculations: traders provide liquidity, which is strongly required in the thinly traded agricultural futures.

Review

Already years ago I called (in the premium area) for a major bear market low in grains for 2016. In early 2015 (Amanita #9/15) this bottom call was fine-tuned to spring/ summer 2016. On 2/28/16 the first strategic soybeans position in years was entered, which has quickly become a gold mine. Soybean prices soared by a whopping +40% in the following months, with S being the most bullish of the major futures in these months (only oil was comparable).

Background

It's also worth noting how soybeans (S) almost completely decoupled from the normally highly correlated grains corn (C) & wheat (W), which barely moved until recently. This is not a surprise at

all... let me give away some secrets. In most agriculturals seasonality is very pronounced, as in soybeans: with a seasonal high around John the Baptist (June 24th), and a seasonal low in October during the Libra time (the sign Libra is ruled by Venus). Unfortunately, some of the seasonal effects are already included in futures prices, which reduces profits somewhat.

For an astrological forecast you first need to know the rulers (planet, sign, and degrees) of a market. The association of the 6 markets in the Amanita system is:

1. precious metals: Sagittarius, especially the Galactic Center at 27° Sagittarius, the physical precious metals center in our galaxy. Amanita Market Forecasting (12/13/00) has the sun at the Galactic Center, which explains the key role of precious metals in the Amanita system & the incredible performance of the gold signals. Other rules: gold = Leo/ Sun, silver = Cancer/ Pisces/ Moon/ Neptune.
2. currencies: Pisces, Neptune, Venus
3. oil: Pisces, Scorpio, Moon, 18° Cancer (108°)
4. agricultural commodities: Cancer, Virgo, Moon
5. bonds: Scorpion, Capricorn (government bonds), Pluto, Saturn
6. equities: Taurus (especially 26°). Amanita (12/13/00) has Saturn sitting at 26° Taurus, which is worst possible synastry connection one can have with a market. That's why the Amanita system allocates very little money (only 2-5%) to the stock markets. In other words, 95-98% of the capital is moved in the other 5 markets. As a matter of fact, without demand being biggest for stock indices, all stock market forecasts would have been discontinued 10+ years ago.

Soybeans, Venus & the 666 Beast

Birth of Venus by Sandro Botticelli

When I began cover grains about a decade ago I first followed the rules of *Norman Winski* from the US (we had a mutual subscription for many years). He claimed that grains (wheat, corn, soybeans) are ruled by Mercury & Virgo. One supportive argument is that grains go through the roof every 9 years when the lunar nodal axis transits Virgo/ Pisces (with solar eclipses in these 2 signs): 1914, 1923/24, 1932, 1941/42 - 1970, 1979/80, 1988/90, 1997, 2007, and 2016/17. However, over the course of time I have arrived at the conclusion that soybeans are primarily ruled by Venus & to a lesser degree by Mercury & Virgo. Why? Follow the explanations below...

First of all, it is eye-catching that soybeans look like a small Venus, the only white planet in our solar system. I recommend reading the book *The Whole Soy Story: The Dark Side of America's Favorite Health Food* by *Dr. Kaayla Daniel*, which debunks today's widespread soy myths. Soy is often marketed as 'health food', although nothing could be further from truth.

No other food is experiencing a comparable hype. Amazingly, in the past months the *Google Trends* search volume for soy has been going through the roof ([Link](#)). This level of crowd madness is only possible around something very negative & detrimental (as is the case with smart-phones). If you study the history of soy, you see the incredible parallels to today:

- *Hitler* was a big fan of soybeans, that's why in the 1930s Germany was the leader in the soybean oil sector.
- *Hitler's* key role model the Duce *Mussolini* even wanted to force soybeans meal into the Italian favorite meal polenta.
- In the 1950s & 1960s the Soviet Union ran a big campaign to promote soy as food.
- The Seventh-day Adventist Church was a driving force behind the soy boom. This kind of 'light version' of *Jehovah's Witnesses* uses a great many Freemasonic symbols...

You see, soy is the darling of the totalitarian collectivist ideologies of both national & international socialism. So it is favored today by the leftists, politically hyper-correct & do-gooders. Isn't it fascinating how the same attitudes align with the same food preferences? Socialism is maximum Yin, while Yang = fist law/ anarchy/ war. In nature the extreme Yin at some points jumps to extreme Yang (and vice versa). Example: a mother animal with her offspring is the strongest Yin, and yet they are the most aggressive animals when they protect their offspring. The same is true of the extreme Yin in society (= socialism), which naturally at some point jumps into extreme Yang (rule of force/ anarchy/ war). But why is soy the preferred choice of totalitarian regimes? Because soybeans serve their goals perfectly:

- brain: Through its impact on major trace elements (zinc, manganese, aluminum, fluorine) it has a very negative impact on brain functions, which contributes to the crowd madness of the goody two-shoes.
- thyroid: Soy dampens the thyroid, so consuming enough creates the sedated sheeple easy to control by the powers that be. It acts similar as Ritalin, which was invented to make zombies out of our children.
- population reduction: Soybean oil is a great bug repellent, as it kills 100% of the gnats. What a 'healthy' food it must be with a kill rate of 100%... The NWO target #1 is population reduction where soy plays a major role, helped by the GMO soybeans in most parts of the world. Frankenstein GMO food never had another purpose than to reduce world population.
- Yin=Venus=6: Soybeans are maximum Yin, as they contain a huge load of phytoestrogens (isoflavones). According to the Swiss Federal Office of Public Health, soy baby food contains as much estrogen as 5-10 (!) birth control pills. By ingesting high doses of female hormones the pill 'fools' the female body that it is pregnant. Soy has a similar effect, confirmed by many lab studies: it crashes the testosterone level of male monkey babies by 70%. Normally male mammals do much better in maze studies: the higher the testosterone levels, the better the visual thinking. Feed the males with soy & they no longer find their right path (only the left). The Yang has to define the path & set the agenda, that's why not being able to fulfill this role is quite painful. Maybe *Moses* (or his people) only wandered for 40 years through the desert because like most men he simply couldn't ask for the way... ☺
Abnormally low testosterone levels have a very negative impact, including sterility. The negative effect of the estrogen bomb on women depends on the dose: too early beginning of puberty, changes in menstruation cycles, involuntary infertility, and diseases of the female organs... Apart from electrosmog the soy consumption of pregnant women is the second main reason why we have had a way too low number of male births in the past years in the socialistic bloc (35% in Germany). The suppression of Mars (= testosterone) was already the driving force behind the invention of Tofu around the year 166 B.C (+/-2 years): food for celibate monks. By the way, the roots of soybeans cultivation started in Japan, which was founded around the year 666 B.C. (+/- some years). In Asia large soy servings were (are?) the secret revenge for cheated wives against their husbands, so that his privates would remain as soft as soy pudding. ☺ In a nutshell, soy is the warfare of the female against the male, similar to the political

fight against all right positions (right = Yang, left = Yin). Soy has a similar effect is circumcision of *every* Muslim boy, which is a mini castration & a theft of the Yang essence. A possible compensation of 'half eunuchs' is a strange male honor cult... The female equivalent of a loss of the Yin essence is the shoe cult many women suffer from (owning 100+ pair of shoes). The human body is clearly polarized, as is everything in this universe: Yin=left/ front/ bottom (earth), Yang=right/ backside/ top (heaven). That's why the left forefoot is the maximum Yin point in the whole body (acupuncture point kidney 1). Since 2014 we are able to replenish the kidney essence & pre-natal qi (Jing) through Vortex Divine Healing®, which is normally impossible.

Note: This negative description is only true of the low-quality soy chunk, which is today's norm unfortunately. Long timeframe fermentation is a deep alchemistic process that transforms many of the negative qualities. In the traditional method of miso, the soybeans are fermented for years, so in principle it becomes a positive elixir (in small servings). But today's miso is usually a poor imitation of the ancient miso.

Forecasting implications

Soy (futures abbreviation: S) is ruled by the Venus (number 6) & especially by the number of the Beast (666). Understanding this rulership is of paramount importance to assess 6 strong correlating factors to soy futures:

1. codes: The all-time high in soybean spot prices was 2012 @ \$1766.6 (+/-0.1), which is certainly not a coincidence ([Link](#)).
2. financial theology: The strength of the EUR (currency of the 666 Beast) & S (food of the 666 Beast) correlates highly with the strength of the powers of evil. To my knowledge no other market letter on this planet makes forecasts based on the balance the of powers of light & darkness, which is crucial in the ongoing end times battle (Armageddon). Actually Amanita Market Forecasting even established the discipline of financial theology, a new paradigm in the forecasting business. According to rumors the pioneer of market theology was the most successful trader *W. D. Gann* (6/6/1878-1955), but very little is known for sure. *Gann* studied the Holy Bible, the pyramids & other esoteric topics. Why is the euro the currency of the 666 Beast? In the Holy Bible the Whore of Babylon is described as the financial center & the home of the Anti-Christ, which is referring to the EU & the euro: the European parliament in Strasbourg is a precise replica of the Tower of Babel...

3. Asteroid 666 DesDEMONa: In the astronomical catalogue every asteroid has a number. No. 666 is 'accidentally' DesDEMONa, with a revolution period of 4 years 66 days. Soybeans follow the empirical pattern of Desdemona, which suggested a low for late 2015 & a high for... The statistical correlation with wheat, corn & other commodity futures is much lower.
4. 6.66 year cycles: S has a history of a few cycles with a length of 6.66 years, one of them

advocated for a low in late 2015/ early 2016.

5. 666 day master cycle of S lows: This cycle has worked since the 1990s, a low was due in February 2016 (annual bottom & beginning of price explosion).
6. 224.7 days master cycle of S trend reversals: The odds of a major reversal (CIT = change in trend) are high when heliocentric Venus transits over the Galactic center (every 224.7 days, as this is the revolution of Venus). The last passage was the low in February 2016, ~225 days after the annual high in July 2015. Why is this conjunction so crucial? Because it marks the Yin maximum. The Mayas also called the Galactic center the *Hunab Ku*, the Galactic vagina. As a matter of fact in the center of our galaxy there is a huge black hole (= maximum Yin). The geocentric conjunction of Venus with the Galactic vagina has a weaker correlation. One can say the transition from the Dark Age into the Golden Age is controlled by the Galactic center, for instance through gamma-ray bursts (GRBs).

Prophecies in the end times

The future ain't what it used to be (Yogi Berra)

In the first 13 years of editing this market letter (2000-13) prophecies were barely taken into consideration. However, since 2013 this has changed from scratch: in the premium area prophecies have been regularly discussed over the past 3 years & used to make successful calls. In April 2016 the electrosmog article series was completed after 7 Biblical years. This newsletter starts a new article series on prophecies, topics of the coming 7+ articles:

1. introduction, end times core scenario
2. personal background, key concepts, types of prophecies
3. 33 confounding factors of good prophecies
4. discussion of the most important prophecies (in 2-3 parts)
5. return of Nibiru
6. timing of the events
7. prepping, getaway spots

Why prophecies since 2013? 3 types of signs

He said to the crowd: "When you see a cloud rising in the west, immediately you say, 'It's going to rain,' and it does. And when the south wind blows, you say, 'It's going to be hot,' and it is.

Hypocrites! You know how to interpret the appearance of the earth and the sky. How is it that you don't know how to interpret this present time? (Luke 12: 54-56)

During normal times prophecies have a great many disadvantages for financial forecasts:

1. too unreliable

2. too ambiguous
3. too subjective
4. too unspecific
5. too contradictory
6. too religious
7. too long-term in the calls
8. too far away from the financial markets
9. not enough timing precision
10. too much focus on one particular timeline (end times)

However, since fall 2015 all doubts have been removed that the end times events will happen in years - not in millennia, centuries, or decades (although the number of years is not 100% certain). One should forget the (few) timing statements of prophecies & instead rely upon the 3 categories of end times signs:

1. strategic signs – have come to pass in the past 100 years:
 - (a) economic, financially: wealth as never before in history (e.g. *Kolbrin Bible* 3500+ years ago, *Alois Irlmaier*). The Sibylline Books already predicted 2,000 years ago today's standard 5-day week with a ~60% tax and contribution ratio in the socialistic bloc: 3 days work for the authorities, 2 days work for oneself. At this time the tithe (10%) was already considered cruel, but nobody have imagined the incredible cruelty of socialism today. Even fiat money & the ensuing inflation & bubbles were foreseen: „*The 8th sign is a profound, long-lasting change in the nature of money. [...] The 6th sign is when houses, property & goods will be bought at way too high levels.*” One of the minor signs of the Qiyamah (Judgment day in Islamic terminology): “*people compete with one another in constructing high buildings.*” Needless to say, this is referring to the skyscrapers of the 20th & 21st century.
 - (b) technology:
 - * airplanes: e.g. *Kolbrin bible* (3000+ years ago), *Saint Odilia* (1300 years ago)
 - * telecommunication (Radio & TV): „*A voice from the sky that everyone will hear in his own language.*” (Qiyamah)
 - * motorized vehicles: „*A journey of a few days is covered in a matter of hours.*” (Qiyamah)
 - (c) politics, wars:
 - * There would be 2 world wars before the final, 3rd one (e.g. *Jahenny, Rill's military letters*). WW3 was already prophesized/ planned (e.g. letter from the High Degree Freemason *Albert Pike* to the illuminati *Giuseppe Mazzini* dated 8/15/1871) as a war of Jews/ Christians against Muslims – voila. Apocalypse 9, 16 states the number of the soldiers as 200 million: “*And the number of the army of the horsemen were two hundred thousand thousand: and I heard the number of them.*” At present we have 1.6 billion Muslims, 10-15% support the Jihad, so we arrive at the number of 200 million.
 - * Several sources stated that communism would end quite soon but later re-appear a second time, so that it dominates in the end times (e.g. *Dannion Brinkley, Garabandal, van Rensburg, farmer from the Waldviertel*). Without doubt, this refers to today's disgusting socialistic bloc (EUSapan).
 - * Many different sources predicted that ahead of the end times there would be a very long peaceful period (e.g. *Emanuel Minos 1968*). The prophecies of *La Salette* (1846) mentioned 25 peaceful years: from 1989-91 (end of Cold War after the fall of the Eastern bloc) until 2014-16 (in 2014 the Ukrainian war restarted the Eastern-Western War – also the IS troops invading Europe since 2015).

* In 1984 the following prophecy of the farmer from the 'Waldviertel' (Austria) was published: „A limited conflict on the Balkans would be the onset of some minor wars, but without a significant impact on the rest of Europe”. The Yugoslav wars 1991-2001 (42 quarters) were indeed the first & only war in Europe since 1945 & one of the strategic signs, albeit without a major impact on the rest of the world.

* Nostradamus wrote in the 16th century in quatrain 10/72: “In the year 1999, 7th [Julian] month [Gregorian = August], from heaven will come a great King of terror.” This is referring to the 8/11/1999 solar eclipse, which is the only visible before 2081 in most of Europe. The 2nd reason for the importance of this solar eclipse was a Grand Cross in the sky (the most difficult of all constellations): beginning of the 40 years of crucifixion of mankind. What a ‘coincidence’ that the most influential politician of the past 20 years (Putin) was appointed on 8/9/1999, just two days before... In the Western lying he is portrayed as described by Nostradamus: as the most dangerous political = ‘King of terror’.

(d) illumination of the soul (e.g. Garabandal since 1961): The average person experiences his life review at the end of their lifetime, as you watch your entire life through the eyes of god. Since the therapy wave beginning in the 1970s, more & more people are prepared for a collective illumination of the soul, to review not only this one incarnation but all incarnations of their soul & the entire Dark Age (Kali Yuga 5,000 years). The pioneer of western soul analysis was the Austrian psychoanalyst Sigmund Freud.

(e) victory of evil, decay of public morals: Now the Luciferian qualities of lies, hypocrisy, indifference, hedonism, decadence, homosexuality & other perversions rule (e.g. Handwerker 1830, Rill's military letters 1918). The essence is starry-eyed idealism (2 Timothy 3): “But mark this: There will be terrible times in the last days [...] pretending a form of godliness but denying its power. Have nothing to do with such people.” Note that already thousands of years ago (!) the Pyramids of Giza predicted that the moral deterioration would began around 1969 (+/- 3 years...)

(f) Yin/ Yang: Many prophecies warned of the sociological phenomena in the end times, which have fully come to pass in the past 20-50 years.

* The forecast of the Qiyamah said that most followers of Sadhana (Dajjal) will be women: 2/3 of the goody-goodies are female.

* a huge number of unmarried or singles

* a great many divorces

* few child birthrates, with many of them bastards

* many childless or barren women, which are appreciated nevertheless

* “The husband will obey his wife, disobey his mother, consider his father to be an outsider, and consider an outsider to be his relative.” (Qiyamah)

The postmodern fatherless society with henpecked husbands has been popular since the 1990s (in the socialistic bloc). This madness must nomologically lead to addictions, invasion of enemies (IS rapugees), dictatorships & total collapse. Dictatorships can only prevail when the Yang (= leadership) of a society has collapsed, so it requires a leadership from outside. The biggest addiction epidemic in history (mobile phone, electrosmog) is yet another symptom of the Yang weakness, because to overcome an addiction you need to say NO: this defense (= Yang) is missing in addicts.

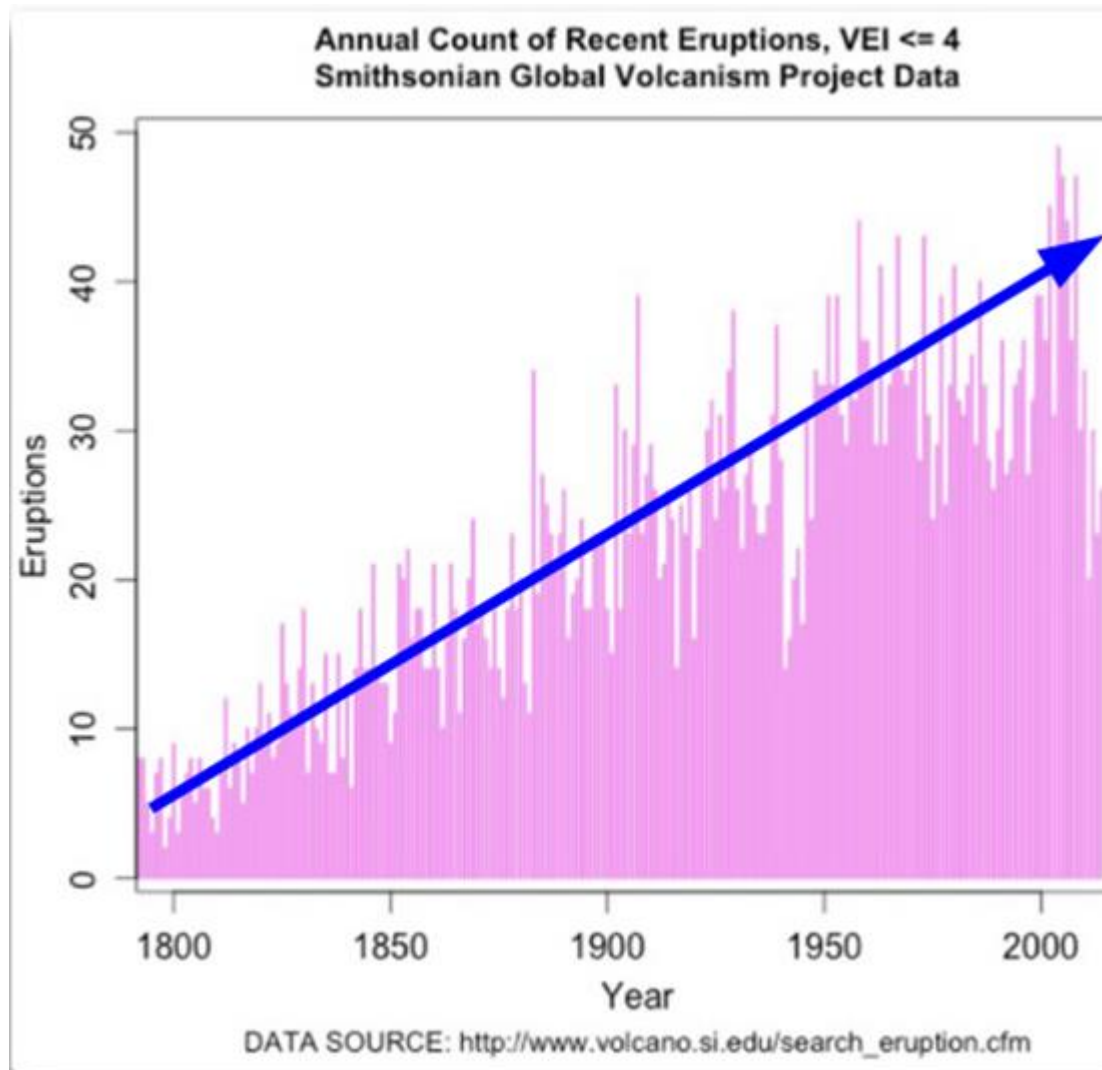

(g) fashion: The prophecies suggested that in the end times the clothes will be so uniform that it would be hard to tell rich from poor, urban from rural & man from woman – which was unthinkable in the past. E.g. the Sibylline Books correctly stated some 2,000 years ago that women would go half-naked, that the fashion would change every year & that the clothing would be frequently thrown away.

(h) earth changes: A vast number of prophetic sources correctly predicted that the number of natural calamities would go through the roof before & during the end times.

* The number of volcano eruptions has risen 10-20fold (!) since the 19th century ([Link](#)). Around 1800 there were many years with only 2-3 eruptions per year, however, this number has soared to an incredible 40-50 annual eruptions in the early 2000s. After a brief decline to 20-30 in the past years there were days in May 2016 with a mind-boggling 40 eruptions ([Link](#)). So the number of eruptions once played out over a decade is now seen in days...

* The number of earthquakes has exploded 5-10fold since the 1980s, with the all-time high in 2013 ([Link](#)).

* Even the recent global warming was foreseen by many prophecies centuries ago.

2. tactical signs - have come to pass in the past 10 years:

(a) religion, spiritually: wellness gospel & persecution of Christianity. Even in the 'Christian' occident there are more & more bans to celebrate Christian holidays, or to wear Christian symbols (e.g. *Mühlhiasl of Apoig 1753-1805*). The Prophecy of the Popes from the year 1596 offered a short description for each of the following 112 Popes. *Pope Francis* (since 2013) is the 112th & thus final Pope in the list – as according to *Saint Malachy* Rome & the Vatican will fall after his rule. *Jorge Mario Bergoglio* is already 80 years (born on 12/17/1936), so from a biological point of view his remaining time in office is restricted to the coming 5-10 years. Note: there is a far-fetched interpretation that there will be a 113th Pope, which I don't agree with but this interpretation can't be outruled with certainty. 4 major arguments against it:

(i) There are prophecies (e.g. *Anna Katharina Emmerick*) that warned of 2 Popes at the same time, one of them being the black pope/ antipope. In 2013 *Pope Benedict* was the first to resign voluntarily (?) in 700+ years (since 1294). Evidence supports the assumption that *Francis* is actually an antipope (the last one was seen in the 15th century).

(ii) Apocalypse 17, 12: „The 10 horns you saw are 10 kings who have not yet received a kingdom, but who for a short time receive authority as kings along with the beast.” This is referring to the 10 secret rulers of the Jesuits, *Bergoglio* is the first Jesuit to become Pope, so these 10 kings without a kingdom finally receive authority.

(iii) *Rill's* military letters mention the critical #12 (#112) in the Holy See (Seat).

(iv) 'Accidentally' *Bergoglio* computes to 666 in the ASCII-Code. Background on *Bergoglio* offered by the Apocalypse: “*This calls for wisdom. Let the person who has insight calculate the number of the beast, for it is the number of a man. That number is 666*”

(b) technology (smart phones): *Alois Irlmaier*, the German Nostradamus, already stated 70+ years ago that he saw people holding a small edged device that would tell them everything they want to know.

(c) 4 codes of the 666 Beast (sign, number, symbol/ name) & image:

*sign of the Beast: The cell phone is the sign of the Beast mentioned in the Holy Bible, which you either hold in your right hand (to type & read) or close to your head (to make calls).

* number of the Beast: The www of the internet is the number of the Beast (w=6 in Hebrew).

* symbol (name) of the Beast: "*Nobody can buy or sell unless they have the mark, which is the name of the beast or the number of its name.*" (Revelation 13: 17) The standard barcodes are the symbol of the Beast & contain her number (3 vertical lines representing the 6). While the first barcode was already scanned on 6/28/1974, it didn't show up on (nearly) all products worldwide until the last decade.

* image of the Beast: The image of the Beast is the computer screen that nearly everybody worships for hours every day.

(d) ratio of genders: Predictions warned of an extreme number of females versus males, between 7:1 (Isaiah 4:1, *farmer Jasper*), 9:1 (*birch tree legend*) or even 40:1 or 50:1 (*Qiyamah*). In the past years a whopping 32% more girls than the historical norm have been born in Germany. This trend is expected to accelerate dramatically.

(e) animal whisperers: „*Wild animals will be able to talk to humans*“ (*Qiyamah*). Animal whisperers hardly existed before the 2000s.

(f) politics: The US will have a black president (e.g. *Monteiro Lobato, Irlmaier, Baba Wanga*), which came true in 2008. Syria holds the key for either world peace or for WW3 (e.g. *Baba Wanga, Veronika Lueken*), which has been true since the first escalation between NATO & Russia over Syria in August 2013.

(g) fashion (e.g. *Mühlhiasl*, Capuchin monk from Düsseldorf, *Josip Terelja*): For men an end times fashion of beards & ear rings was predicted. Bingo: from 2012 into 2016 search volume for *full beard* soared 20-fold ([Link](#)). Some of the invaders in Europe want to make beards mandatory. *Lungenschmid* was already told in 1973 that in the end times people would voluntarily mutilate themselves through tattoos & piercings.

3. final signs – have come to pass since the summer of 2015:

(a) railway over the Reschen Pass/ Austria: The Austrian clergy *Simon Alois Maaß* (5/6/1748-1846) prophesied that there would be 3 attempts to build a railway over the Reschen Pass (Austria). Each time the attempt would be stopped because of a war. So far this call has been spot on: the first two attempts stopped around WW1 & WW2. Finally, on 9/18/2015 the political decision for a 3rd attempt was made... *Maaß* states that the 3rd attempt will fail, too, as it will be stopped by the world catastrophe...

(b) Bernhard Rembold (Spielbahn) 1829: He stated nearly two centuries ago that soon after a bridge is built over the Rhine near Mondorf (south of Cologne, Germany) the big war will start. In 2016, after many decades of discussion, it was finally decided to build this bridge...

(c) invasion by a great many Arabs/ Muslims in Europe (e.g. *Edward Korkowski, Father Klimuszko, Bariona, Irlmaier, song of the lime tree, Van Rensburg, Ferdinand Ossendowski* 1921, farmer from the *Waldviertel/ Austria, Emanuel Minos* 1968). Quote *Irlmaier* 60+ years ago: „*Near the Rhine I see a half moon [= Islam] that wants to devour everything. The horns of the crescent want to close.*“ One German dental nurse already saw in 2008 that the occupants from the Middle East *secretly* invade Europe, which at this time nobody understood ([link](#)). All these calls have been fully fulfilled since the summer/ fall 2015, with the first battle of the IS rapugees on European soil at Sylvester 2015/16 in the biggest Rhine town (Cologne)... Note that the first Crusade (Christianity against Islam) began in March 1096 from Cologne, too: acceleration of geographic-religious karma.

(d) construction of the 3rd Jewish Temple in Jerusalem: This is **by far** the most important of all signs... Actually the 3rd Temple is **the** key event expected (or feared) by the end times community for nearly 2000 years: since the destruction of the 2nd temple in the year 70 AD. What a 'coincidence' that the 3rd Temple was announced just a few months after the age of Israel of 66.6 years (5/14/1948)... That's why I began to work on this article series in the summer of 2015, after hearing of this news. The 3rd Temple shall replace the Dome of the Rock (left-hand side) & the al-Aqsa-Mosque (right-hand side): Removing these two key Muslim

sanctuaries will send the entire Middle East into flames...

Needless to say, the end times were called by various prophets many times in the past, although it was just never rationally justified, because the key requirements discussed above were not fulfilled at all. Analysis of crowd madness through *Google Trends* fully supports my call ([Link](#)), because the brain-washed sheeple always bet on the wrong horse:

- Ahead of peaceful & ,boring‘ times the crowd is interested as hell in search terms such as *Prophecy, Armageddon, Nostradamus, World War, Antichrist* & related stuff. So the all-time highs in most search terms were in 2004-5, ahead of the calm years 2005-7.
- In contrast, ahead of wars & major upheaval the sheeple are not interested at all, as since the summer of 2015. In 2016 relevant search volumes are at or just above the all-time lows – exactly what you would expect before a terrible escalation.

This is the statistical analysis, however anecdotally we find the same pattern in 2016. From a sentiment perspective we know that the capitulation of the key people always happens at the perfectly wrong moment, i.e. before the trend changes (or the favored scenario finally comes to pass). This capitulation was observed in some forums in the past months.

Note: The strategic signs discussed at the beginning are certainly not a singular event. Instead, they follow mostly the 700-year cycle of civilizations first outlined by the German philosopher *Oswald Spengler* (5/29/1880-1936). The ‘ethical socialism’ (term coined by *Spengler*) marks the final dying phase of a civilization, before returning to the ‘Fellahin’ stage (pure farming society). It is not a coincidence that *Spengler* completed his first volume at the age of 37 years: 37-38 years is the productivity high in the human life cycle (37 = divine grace).

Spengler discussed 8 major cultural cycles in the past 5,000 years, with Egypt & Babylon the first to begin. He stated the average length of the civilization cycle roughly as 1000 years, which has been fine-tuned to ~700 years by further research ([Link](#)). By the way, I set the beginning for the Western cycle in the 14th century, not in the year 900 AD as suggested by *Spengler*. As *Edgar*

Cayce, Dannion Brinkley & other prophets he sees the new (9th) cycle emerging from Russia. However, the decline of the West has been delayed because the rest of the world has mostly adopted the Faustian cycle in the past century. Amazingly, the Western development of the past centuries has been copied by most other countries within recent decades, with only some parts of Africa & India clearly behind. That's why we now have a global civilization cycle, for the first time in history. Still, one can assume that *Spengler* had no significant impact on the prophecies as:

1. Most prophecies were published before the publication of *Der Untergang des Abendlands* in 1918.
2. The newer prophets were mostly uneducated & hardly aware of *Spengler*.
3. Many prophecies suggest events not mentioned by *Spengler* at all, because they are so specific, unique & not part of the 'short' 700-year cycle of civilizations. The remainder is explained mainly by these 3 cycles: 3,600 years Nibiru, 25,700 years world ages, 62 million years mass extinction (90° of one revolution of our solar system around the Galactic Center). We are at least the 5th major civilization to end & collapse. #3 was Lemuria that was destroyed more than 50,000 years ago (2 world ages) & #4 was Atlantis, which was technologically even more advanced than we are today. The long decline of Atlantis ended around the year 9545 B.C., when the (biggest) deluge took place according to the leading Austrian geologist *Prof. Dr. Alexander Tollmann*. Early Atlantis was still rather peaceful with magician wars only, which slowly became 'full' wars after many millennia. Many elitists want to continue where Atlantis ended: in his 3/26/2010 speech *Herman Van Rompuy*, the president of the European Council, defended the transatlantic partnership "*in the name of Atlantis*" ([Link](#)).

End times core scenario: 3 phases

Do not suppose that I have come to bring peace to the earth. I did not come to bring peace, but a sword. (Matthew 10: 34)

The core of the accurate prophecies is amazingly consistent in describing crystal-clear end times scenarios consisting of 3 phases:

1. man-made:
 - (a) economic collapse (e.g. *Howard Storm*)
 - (b) civil wars in Europe & many parts of the world: This should reduce the world population by some tenths of a percentage point (<1%). 2 focus points:
 - * Paris will be torched by their own population & mostly destroyed. In France martial law has been in effect since November 2015.
 - * Rome as the center of Christianity will be invaded & destroyed, the Pope has to escape (e.g. *Malachias*).
 - (c) WW3: In the year X the riots escalate into full-blown worldwide wars, including the limited use of ABC weapons (e.g. *Howard Storm*). The trigger appears to be an attack by Turkey against Greece some years (months?) before. This is the time when Russia intervenes & tears Turkey in pieces. According to the Holy Bible, Israel will be first attacked from Egypt, when Russia steps in again, so the entire Middle East is in flames. There are big battles near Jerusalem, with the final end times battle in the *Harmageddon* valley (the root of the name *Armageddon*), close to *Afula* which is near the Israeli harbor town *Haifa*. According to the Holy Bible this war kills 2/3 of the Israeli population. Finally, in the end Russia surprisingly invades Europe in 3 lines: North (Scandinavia), middle (Germany), South (Southern Europe). Apparently the Russian troops don't get much further than to the Rhine, possibly into Eastern France. The final battle on European soil is near Cologne, just like the first battle (attack of rapugees in the Sylvester night 2015/16). China and/ or Russia also invade Northern America (US + Canada), at least the Western part. However, at the end even the two allies China & Russia start fighting each other, and China wins. WW3 presumably costs the life of some percentage points of world population, comparable to WW2 which killed 3% of the world population. Almost the whole death toll originates in the final 3-3.6 war months in the summer/

fall of the year X, which begins around July 25-August 1 of year X.

2. not man-made (earth changes & 3 days of darkness):

Already in the years ahead of day X the number of natural calamities increases dramatically. At any rate, WW3 ends in late fall (late October through early December) of year X because of incredible worldwide natural disasters, caused by an approaching celestial body (return of Nibiru). One should not attempt a more precise timing than weeks, as Matthew 25: 13 warns: "*Therefore keep watch, because you do not know the day or the hour.*" These 7 earth changes can be expected:

(i) volcano eruptions: among others in South America & Southern Italy (Mount Vesuvius)

(ii) impacts of meteorites: inter alia in the Czech Republic

(iii) hurricanes, tornados

(iv) floods/ tsunamis: on many/ most/ all coasts around the globe, with a height of at least 30-50 meters/ yards (but possibly *much* higher) – e.g. in Paraguay & at the North Sea coast.

(iv) showers of sparks & stones & ash, poison (dust/ smoke) in the atmosphere: world-wide (?)

(vi) earthquakes (world quake), pole shift, continental shift: world-wide. Parts of continents go into the sea, while elsewhere new land arises. The US is torn into 2 pieces, the San Andreas Fault opens & California goes into the sea. Japan & Australia partly sink into the sea, too. We experience a pole shift (shift of the Earth's crust) by 10-30°. The new poles are most likely near Brazil & near Eastern Russia/ Bering Sea.

(vii) 3 days of darkness: peak, core event & completion! *If* the 3 days of darkness do occur, then this event will kill 25-85% of world population, 10-20x more than the previous war. One must not take oneself outside during these days, presumably because of the toxic dust. Death rates should vary a lot: range 10%-100.00%. Small offshore nations might disappear entirely. In a religious context this is considered to be the advent/ return of the *Messiah*.

3. afterwards:

* 40 quarters/ years/ decades: The first 40 quarters (10 years) after the 3 dark days will be very difficult for the planet (2nd testing), to a lesser degree the first 40 years afterwards. The Golden Age needs 40 decades (400 years) to fully manifest on the planet.

* epidemics: In the first 40 quarters after day X many epidemics can be expected & likely already appearing in the quarters/ years *before* the main destruction (e.g. *Spielbahn, Kugelbeer, Qiyamah*). *Stephen Schwartz* says that an epidemic will reduce the world population by 25% in less than some months. As described in the electrosmog article series, a giant wave of diseases is inevitable in the 2020s (or 2030s at the very latest). Apocalypse 15: 2 warns that those accepting the sign of the 666 Beast (= mobile phone) will develop a painful cancer. The extreme cancerogenic effects of microwaves have been known for 80 years (since the 1930s), confirmed by more than 10,000 studies.

* technology: After the main cataclysms there will be hardly any diseases & mankind will benefit from free energy (e.g. *Stephen Schwartz*, farmer from the Waldviertel).

* politics: There will be peace for centuries, however, in the decades around the 2400 there will be first a minor & later a major war. First there will be a complete political restructuring: The world power of the past 100+ years (US) disintegrates into 4-5 individual states, with Denver & Atlanta becoming new capitals. In Europe there is something like a Holy Roman Empire of the German Nation, after the coronation of an emperor in Cologne (many sources, e.g. *Sajaha, Cayce*). In the 1000 years of the Golden Age the German people will be the leader of mankind. The Jewish people have been the leaders over the past 5000 years. "*Therefore I tell you that the kingdom of God will be taken away from you [the Jewish people] and given to a people who will produce its fruit*" (Matthew 21: 43). According to the original text available from the archive of the *Societas Templi Marcioni* he said these words to the German soldiers, i.e. the Germans are the 'other' or 'new' people he was referring to. Needless to say, this has been known for a long time & explains the incredible hatred of some 'chosen ones' toward Germany & why Germany+Australia had to be the center of destruction in 2 world wars.

So the death toll rises with each new phase by a factor of about 10:

1. civil wars: some tenths of a percentage point (<1%) of the world population
2. world war: some (several?) percentage points of the world population
3. earth changes (including epidemics): 25-90% of the world population may perish. The death rates should vary a lot, with a range 10%-100.00%. Some small coastal countries could be history altogether. That's why according to so many prophecies eventually world population could crash by 80-95% in the 21st century, possibly toward 300-500 million (e.g. *Helen Wambach, Chet Snow*).

It is highly unlikely (P<5%) that we will leave out one of the 3 escalation waves. I am very confident (P>95%) that these 3 phases will be "delivered" in one 'package' not to be 'negotiated'. In other words, the death toll electrosmog is able to produce in decades would be caused by earth changes in a mere 3 days: a 1000+ fold acceleration. Fortunately, in contrast to electrosmog these end times scenarios call are *not* 100% carved in stone. The 3 timelines for the final 3 months/ 3 days:

1. fall 2022 (maybe 2021 or 2023?): P=88%
2. 2030-32: P=11% (unlikely, but still realistic)
3. 2040-41: P<1%. At present the final period of grace in 2040-41 can be outruled as a realistic timeline. So if these events haven't unfolded by 2033, you can be 99% sure that they won't happen during our lifetime.
